

# Line Boring Service

**PAPÉ**<sup>SM</sup>

**When it's time to re-bore to manufacturers specifications, count on Papé service.**

**Anytime. Anywhere.**

Papé Machinery has the solutions for line boring. The need to re-bore frames to original specifications is an eventuality that every hard-working piece of equipment faces. Our qualified technicians will be there twenty-four, seven - to assess the work and get the job done right. When you need help keeping your equipment running and want to help make the best financial decision for service or repair, there's only one place to call - that's Papé Machinery.

**Count on Papé.**

Call your Papé Machinery CSA to schedule our on-site portable line boring service. Papé Machinery will perform the service at your shop or job site and re-bore bushings back to factory specification. We provide welding and re-boring of:

- Upper and lower loader articulation joints
- Lower loader arms and bucket ears
- Excavator/backhoe pins and bushings
- Welding and re-boring of joint 1" - 10"

\*No payments, no interest for 120 days! (\$3,000 minimum purchase), or 4.9% APR for 12 months! (\$3,000 minimum purchase). Subject to John Deere Credit approval. Prior purchases are not eligible. PowerPlan is a service of FPC Financial, f.s.b.
